**Now Offering
GDI
Service**

Some newer vehicles now have a fuel delivery system called Gas Direct Injection. GDI systems inject the fuel directly into the cylinders bypassing the intake valves in the engine. This can lead to carbon building up on the valves which can lower gas mileage and power. Our GDI service not only cleans the intake valves it will also clean the spark plugs, combustion chamber and other parts of your engine.

Car manufacturers are recommending GDI service every 20,000 to 30,000 miles.

Amazing friendly service

Tigard Premier Auto Service is an amazing place. Friendly staff and always on time with appointments. The staff does a great job explaining the service that was completed and they don't try to trick you with services you don't need. A great business and highly recommend.

Friendly and efficient

I've been going to Premier for over two years now. Chris and Patrick are so nice and take great care of my 2005 Pacifica. They explain anything that needs to be done and I usually get the car back the same day. I rely on them to keep me safely on the road.

Reliable work done.

They got my truck into the shop the same day and did a very thorough inspection. They told me everything that was going on with the truck and quoted me a fair price. The work they did made my truck run better and more efficiently. Also, my car was ready to pick up in a short amount of time. I'll definitely be back for maintenance.
